

Zilla® Helical System

The Zilla® Helical System is the best field adjustable ground mount racking system to date. This ground anchoring system is undeniably the fastest and easiest way to attach a PV or Solar Thermal system to the ground. Helical Anchors can be set in less than one minute each, and are immediately ready for leveling and attachment, no concrete required. Foundation, racking and panels can be completely installed in a single day. The Zilla® Helical System works best when used in non-rocky soil types and will not auger into bedrock or soil with large rocks.

- Available in 4', 5', 6', or 7' lengths
- Custom lengths and configurations available
- Drive each Helical in less than a minute!
- Field adjustable for uneven surfaces
- Ensures fastest installation - minutes instead of days
- Compatible with Zilla® Rac hardware
- Adapts to fit most Power Take-Offs (PTO)
- New Adapter - easily adjusts, accepts more components
- Hot Dip Galvanized after fabrication
- Requires no concrete
