To Whom it May Concern:

SUBJECT: BONDING WITH ZILLA® SPLICE BAR

The Zilla® Splice Bar is approved for use as an electrical bond between two separate Zilla® rails (2.0, dual grip, grip, or 3.5). The stainless steel bolts shall be tightened to 19 ft-lbs to ensure the teeth of the two-side externally serrated washers cut into the top of the Zilla® rail section. The stainless steel bolts must engage not less than two threads into the aluminum splice bar in accordance with NEC Article 250.

Sincerely,

A handwritten signature in black ink, appearing to read "Dave Kreutzman".

Dave Kreutzman, Chief Technical Officer
